

ASSET MANAGEMENT/ PRIVATE EQUITY

About the Sector

Since the collapse of the Irish property sector in the period from 2008-2013 we have seen the emergence and re-emergence of a new breed of property owner. Professional, structured, well governed businesses are succeeding where the old breed of casual "have a go" developers and landlords have fallen by the wayside. This has seen the arrival of sophisticated joint venture partners and professional asset managers, running multi disciplinary teams of specialists. This is the work we do and we love it.

Asset Management requires a specialist skill set to deliver long-term effectiveness and efficiencies. We provide property owners and lenders with a reporting system to help appraise and manage multi-sector property portfolios.

With the arrival of new international capital into the Irish property market we have acted in a number of joint venture schemes, with multiple participants on different levels. We want to be in the heart of the deals, helping clients devise clear and well understood exit plans and making sure that developments and plans are delivered quickly and efficiently.
