

GDPR COMPLIANCE THE DEADLINE IS APPROACHING DON'T GET FINED, GET READY

What is GDPR?

The General Data Protection Regulation (GDPR) strengthens and unifies data protection in the EU. Compliance is now a must for all businesses.

How does it affect me?

If you do any business that involves personal data belonging to EU residents then you need be compliant by the **25 May 2018 deadline**. Failure to comply can result in **significant fines** of up to €20 million or 4% of global turnover.

What kind of data does it relate to?

It can include employees' and customers' personal data along with potential customers' personal data. Any data you hold on a living individual is personal data and covered by GDPR. All departments in your organisation will be impacted.

What do I need to do?

You need to review your current level of compliance with GDPR principles and put plans and strategies in place to improve any areas where compliance is low. Compliance is also about continuous improvement and accountability so the obligations are ongoing.

DON'T LEAVE IT TOO LATE!

Our GDPR Technology Team & Experience;

Our team is led by **Karl Manweiler**, Managing Director of Leman Consulting. Karl holds academic and professional qualifications in law, technology and project management. Karl is also a certified auditor. Karl is assisted by Joshua Zell, Associate and Morgan Crowe, Solicitor. They each have years of experience in;

- Advising a variety of organisations from sports bodies to commercial enterprises on their data protection obligations.
- Advising large multinationals in respect of the management and transfer of sensitive personal and employee data.
 - Auditing clients on their readiness for GDPR and assisting with implementation of compliant policies.
- Delivering enterprise technology projects across both public and private sector organisations in Ireland, UK and the US.
 - Advising and managing multinational enterprises on their technology strategy and digital transformation projects.
 - Advising organisations on cybersecurity and data protection strategy.

Fee quotes will depend on size and complexity of organisation as well as scope of services required.
